GREGORY TAKAHASHI

Chief Technology Officer | AI Platforms and Engineering Culture | Scaled Engineering from 120 to 900

New York, NY | g.takahashi@example.com | (646) 555-0181 | linkedin.com/in/gregorytakahashi-example

EXECUTIVE SUMMARY

Technology executive with 22 years in financial services and software, including 9 years as a CTO or SVP of Engineering at public and private equity backed firms. Built engineering organizations where sharing is part of the culture: enterprise InnerSource programs, AI platforms that teams reuse instead of rebuild, and communities of practice that executives and HR treat as real technical impact. Partner to the CEO, board technology and risk committees, and regulators.

SIGNATURE ACHIEVEMENTS

Built Velora Wealth's enterprise AI platform and reuse program, now used by 70 teams, cutting duplicate AI projects by an estimated 60 percent and saving $18M in engineering cost over three years.

Created the firm's "Guild" model of communities of practice, with 1,900 active members, and made contribution and mentorship a promotion criterion with the CHRO.

Led the technology integration of two acquisitions ($240M combined) within 14 months while holding platform uptime above 99.95 percent.

Scaled engineering from 120 to 900 people across New York, Toronto, and Bangalore while improving engagement scores 19 points.

PROFESSIONAL EXPERIENCE

Velora Wealth (NYSE-listed wealth technology platform, $1.4B revenue) | New York, NY

Chief Technology Officer | 2020 to Present

Joined after the IPO to modernize a fragmented estate of 40+ engineering teams and to lead the company's AI strategy. Report to the CEO; member of the executive committee; present quarterly to the board's technology and risk committee. Own a $210M technology budget and 900 people.

AI platform and reuse

Founded an internal AI platform team and InnerSource program with shared source control, contribution standards, quality tiers, and a governed sandbox; 640 reusable components, agent skills, and evaluation patterns now in the catalog.

Launched an AI request intake that matches business needs to existing assets and owners, resolving half of new requests through reuse.

Engineering culture and community

Built communities of practice, office hours, and an annual internal summit; contributor numbers grew eightfold in three years.

Designed recognition and career signals for contribution, maintenance, and mentorship with the CHRO and the executive committee.

Governance and risk

Set a lightweight AI governance model with the CRO and model risk, clearing low-risk assets in days rather than months, and passed two regulatory technology examinations with no findings.

Financial

Reduced run-rate infrastructure cost 22 percent ($31M) while funding the AI platform within the existing budget.

Harbor and Lane Financial (private equity backed, $380M revenue) | Boston, MA

SVP, Engineering | 2015 to 2020

Recruited by the sponsor to rebuild engineering ahead of a sale. Reported to the CEO; led 260 people and a $58M budget.

Transformation
Moved 70 percent of workloads to cloud and introduced InnerSource practices that cut new product build time 35 percent.

Outcome
Engineering diligence was cited as a strength in the 2020 sale to a strategic buyer at 3.1x the sponsor's entry multiple.

EARLIER CAREER

VP, Engineering, Quantive (2011 to 2015). Engineering Manager, Lexmont Systems (2006 to 2011). Software Engineer, Lexmont Systems (2003 to 2006).

BOARD AND ADVISORY

Independent Director, Alder Health Technologies (Nasdaq listed), Chair of the Technology and Risk Committee, member of the Audit Committee, 2022 to Present.

Advisory Board, Open Ledger Foundation (open-source standards for financial services), 2021 to Present.

EDUCATION

M.S. Computer Science, Carnegie Mellon University. B.S. Electrical Engineering, University of Michigan. Stanford Executive Program, 2019.
